## SYSTEM INFORMATION

Water Source

*Open channel, domestic, industrial, sea water, etc.*

Water Quality

*TSS, NTU, TDS values, if available.*

Filtered Water Application Area

*Coolant tower, irrigation, boiler feed, etc.*

Contaminant Type

*Sand, silt, suspended pollutant, algae, fish and mussels, eggs, leaves, etc.*

Water Temperature (°C)

Operating Pressure (bar)

Filtered Water Pipeline Conditions

*Filtered water pipeline open to atmosphere or continue as pressurized system, etc.*

Total Flow Rate (m<sup>3</sup>/h or gpm)

Flow Rate / Filter (m<sup>3</sup>/h or gpm)

Pipeline Diameter (inch or mm)

Any Pretreatment Unit before Self-Cleaning Filter?

## REQUESTED FILTRATION SYSTEM

Filter Model

No. of Units

Filtration Level (micron)

Requested Body Material

Requested Filter Element (Screen) Material

Design Pressure (bar)

Design Temperature (°C)

Control System

Power Supply

Accessories or Additional Equipment

Other Information or System Details

Please provide flow diagrams or other drawings related to the system along with this document.
