

Filternox®

With our Automatic Self-Cleaning Filters under the trademark Filternox®, we propose custom-made and cost effective solutions to meet your requirements as per your specifications.

As well as in other industries and sectors, we have wide and major experience in well water filtration applications.

Our recently developed patented **SPT-WBV-MR** Filternox® filter has the capability of handling high dirt loads with its special automatic back flushing system.

These special characteristics of the filter enable us to implement direct installation of Filternox® **SPT-WBV-MR** filters after the well pump and avoiding a balance tank.

Application of Filternox® SPT-WBV-MR model filter for well water filtration.

With its mechanical and technical design, provides high durable filtration solution during operations and low maintenance requirements. Easily customized by our engineers according to flow capacity, water quality, material requirement and other specifications.
